## Essential Question How can you use a volume formula to find

missing dimensions of prisms?

1

## ACTIVITY: Finding Missing Dimensions

#### Work with a partner. Solve the equation for *x*.

**a.** Volume: 264 = 24x

**c.** Volume: 45 = 9x

**e.** Volume: 288 = 48x

**b.** Volume: 162 = 18x

**d.** Volume: 12 = 8x

## **ACTIVITY:** Finding Dimensions

Work with a partner. Is there enough information given to estimate the volume of each building? If not, explain why. If there is enough information, estimate the volume of the building.

Republic Plaza Denver, CO 56 Stories: 714 ft 1,340,000 ft<sup>2</sup> floor space

Seagram Building New York, NY 38 Stories: 515 ft 820,000 ft<sup>2</sup> floor space

Espirito Santo Plaza Miami, FL 37 Stories: 483 ft 750,000 ft<sup>2</sup> floor space

# What Is Your Answer?

- **3. IN YOUR OWN WORDS** How can you use a volume formula to find missing dimensions of prisms?
- **4.** Design a skyscraper that will be 10% taller than one of the skyscrapers in Activity 2. Find its volume.

"Dear Sir. The question 'How much is half of 8?' is confusing."

"If you mean up and down, the answer is 3. If you mean sideways, the answer is 0."

Use what you learned about finding dimensions of prisms to complete Exercises 9–11 on page 316.

Algebra  $V = \ell wh$ 

Length,  $\ell$ 

EXAMPLE 2

## Finding the Volume of a Rectangular Prism

#### Find the volume of the rectangular prism.

| Write formula for volume. |
|---------------------------|
| Substitute values.        |
| Multiply.                 |
|                           |

• The volume is 140 cubic meters.

### On Your Own

EXAMPLE 3

## Finding a Missing Dimension of a Rectangular Prism

Volume =  $1792 \text{ in.}^{3}$ 

Write and solve an equation to find the height of the computer tower.

| $V = \ell w h$                        | Write formula for volume.                           |
|---------------------------------------|---|
| 1792 = 7(16)h                         | Substitute 1792 for V, 7 for $\ell$ , and 16 for w. |
| 1792 = 112h                           | Simplify.   |
| $\frac{1792}{112} = \frac{112h}{112}$ | Divide each side by 112.                            |
| 16 = h                                | Simplify.   |

• The height is 16 inches.

### 📄 On Your Own

# Vocabulary and Concept Check

1. VOCABULARY What types of units are used to describe volume?

7.

2. VOCABULARY What types of units are used to describe area?

# Practice and Problem Solving

Find the number of cubes it takes to fill the box.

2

### Find the volume of the rectangular prism.

Write and solve an equation to find the missing dimension of the rectangular prism.

**9.** Volume =  $1620 \text{ cm}^3$ 

**10.** Volume =  $220.5 \text{ cm}^3$ 

**11.** Volume =  $177,500 \text{ mm}^3$ 

**12.** Volume =  $646 \text{ in.}^3$ 

**13.** Volume =  $936 \text{ in.}^3$ 

14 in.

12 in.

**14. BUG TRAP** What is the volume of the trap used to collect bugs?

- **15. CUBE** How many 1-centimeter cubes are needed to create a cube with a side length of 6 centimeters?
- **16. FISH TANK** The fish tank is 80% full. After adding stones to the bottom of the tank, the tank is 92% full. What is the volume of the stones?

- **17. RESEARCH** Use the Internet or some other resource to estimate the sizes of the seashells in the shadow box.
  - **a.** Draw a box that will hold all of the shells.
  - **b.** Find the volume of your box.
- **18. GEOMETRY** The area of the shaded face is 96 square centimeters. What is the volume of the rectangular prism?

### **19. FOOD STORAGE**

- a. Estimate the amount of macaroni and cheese left in the casserole.
- **b.** Will the macaroni and cheese fit in the storage container? Explain your reasoning.
- The outside dimensions of a rectangular cooler without its top 20. are 26 inches by 14 inches by 16 inches. The cooler is 2 inches thick. What is the volume inside the cooler?

4 in.

#### Fair Game Review What you learned in previous grades & lessons Tell whether the given value is a solution of the equation. **21.** x + 17 = 24; x = 7**22.** 6x = 72; x = 13**23.** x - 19 = 42; x = 2124. MULTIPLE CHOICE What is the area of the semicircular region? (**A**) 127.17 $ft^2$ **(B)** 254.34 ft<sup>2</sup> $\bigcirc$ 506.68 ft<sup>2</sup> $(\mathbf{D})$ 1017.36 ft<sup>2</sup>
